WORK EXPERIENCE

Technical Product Analyst -1
Juspay

05/2022 - Present   *Bangalore, India*

Payment gateway company uses functional programming as it's Skill Stack.

Achievements/Tasks

- Working in Dashboard team. I make use of React and Rescript to make UI Components daily and also connect backend data to make a functional component.
- Working on FinOps DashBoard. In this I make use of ReScript and other languages to make a dashboard for sales and merchant to be used in MSME.
- Learning new thing every day.

ReactJS · Rescript · Javascript · JSX · HTML · CSS · Purescript · Flutter · Django · R Language · Python · C programming · Debugging · Basic Java · Problem Solving · Basic SQL · API · Fast Learner · Functional Programming · Elm Architecture · Haskell

PERSONAL PROJECTS

EC Analytics DashBoard (12/2022 - Present)

- This Dashboard is used by many known companies like AXIS-bank.
- Made use of React to create different UI components, and create a friendly UI.
- Created a Component which would make use of bulk upload by agents in csv format.

FinOps Dashboard (03/2022 - Present)

- A Dashboard interface for merchant and agents to be used in sales made under Juspay.
- This Dashboard can help in providing loans and keep track of the process.
- This is a very complex dashboard with a lot of features embedded in it and I have been a major player in development of this project.

LogViewer DashBoard (11/2022 - Present)

- Used by Internal workforce of Juspay to keep track of different Logs.
- Added different new features and work on the maintenance of this dashboard.

OJL DashBoard (08/2022 - Present)

- This Dashboard was made specifically for Other Juspay lenders and I played a major role during development of this project.
- Added different new features and work on the maintenance of this dashboard.

To-Do Application (10/2022 - Present)

- A to-do list application that allows users to create and manage tasks, set due dates, and mark tasks as complete. This project includes additional features such as categorizing tasks and setting reminders.

Weather App (11/2022 - Present)

- A weather app that displays the current weather and forecast for a given location. This project involves integrating with a weather API and using React to display the data in an interactive and user-friendly way.

Invoice Now (08/2021 - 10/2021)

- A Payment Application Gateway made under Juspay.
